Reg.no: 192521391

EXP 12: Demonstrate virtualization by Installing Type-2 Hypervisor in your device, create and configure VM image with a Host Operating system (Either Windows/Linux).

Aim:

To demonstrate virtualization by installing Type-2 Hypervisor and to create and configure VM image with a Host Operating System .

Steps:

1. Download VMware software and install it as Type-2 Hypervisor.
2. Download Ubuntu or tiny os as ISO image file.
3. In VMware workstation Create new VM
4. Do the basic configuration.
 - a. Change number of processors or memory size etc, if needed.
 - b. If extra hard disk is needed, double click on hard disk add additional hard disk.
5. Created a virtual Machine.
6. Launch the VM.

Implementation:

2. Create a new VM

3. VM is created

4. Double-click on each and Change the memory size , number of hard disks

, number of processors if needed.

EXP 13: Create a Virtual Machine with 1 CPU, 2GB RAM and 15GB storage disk using a Type 2 Virtualization Software.

Aim:

To Create a Virtual Machine with 1 CPU, 2GB RAM and 15GB storage disk.

Steps:

1. Download VMware software and install it as Type-2 Hypervisor.
2. Download Ubuntu or tiny OS as ISO image file.
3. In VMware workstation à Create new VM
4. Do the configuration based on given conditions.
 - a. Change number of processors to 1.
 - b. Change Memory to 2 GB and storage to 15 GB.
5. Created a virtual Machine.
6. Launch the VM.

Implementation:

2. Create a new VM

WORKSTATION PRO 17

Name it anythingàclick on nextàAdjust the size of disk à change the option to first and then click on next.

Click on Finish to Launch

3. VM is created

4. Double-click on processors and Change number of

Processors.

EXP 14 : Create a Virtual Hard Disk and allocate the storage using VM ware Workstation.

Aim:

To Create a Virtual Hard Disk and allocate the storage using VM ware Workstation.

Steps:

1. Download VMware software and install it as Type-2 Hypervisor.

2. Download Ubuntu or tiny os as ISO image file.
3. In VMware workstation à Create new VM
4. Do the configuration based on given conditions.
 - a. Add extra Hard disk and allocate Storage to it.
5. Created a virtual Machine.
6. Launch the VM.

Implementation:

WORKSTATION PRO[™] 17

WORKSTATION PRO[™] 17

3. VM is created

4. Double-click on Hard disk and Click on add and create a new Hard disk

EXP 15: Create a Snapshot of a VM and Test it by loading the Previous Version/Cloned VM

Aim:

To Create a Snapshot of a VM and Test it by loading the Previous Version/Cloned VM.

Steps:

1. Download VMware software and install it as Type-2 Hypervisor.
2. Download Ubuntu or tiny os as ISO image file.
3. In VMware workstation à Create new VM
4. Do the configuration based on given conditions.
 - a. Add extra Hard disk and allocate Storage to it.
5. Create VM
6. Go to VM à Click on Snapshot à Take snapshot.
7. We can create n number of Snapshots and can be view through snapshot Manager.
8. Launch the VM.

Implementation:

1. Download and open VMware software.
2. Create a new VM

Name it anything à click on next à Adjust the size of disk à change the option to first and then click on next.

3. VM is created

EXP 16:- Create a Cloning of a VM and Test it by loading the Previous Version/Cloned VM

Aim:

To Create a Cloning of a VM and Test it by loading the Previous Version/Cloned VM.

Steps:

1. Download VMware software and install it as Type-2

2. Create a new VM

3. VM is created

4. Create Clone

Clone has Created and it has same properties as before VM.

EXP17- Change Hardware compatibility of a VM (Either by clone/ create new one) which is already created and configured and run simple unix commands

Aim:

Change Hardware compatibility of a VM (Either by clone/ create new one) which is already created and configured and run simple unix

Steps:

1. Download VMware software and install it as Type-2 Hypervisor.
2. Download Ubuntu or tiny OS as ISO image file.
3. In VMware workstation à Create new VM
4. Do the configuration based on given conditions.
5. Create VM
6. Go to VMà Manage à Clone .
7. A Orange color desktop will open, simple unix commands are performed.
8. Launch the VM.

Implementation:

1. Download and open VMware software.

2. Create a new VM

WORKSTATION PRO™ 17

Fig: Click on Finish to Launch .

4. Create Clone

Fig : SSClone has Created and it has same properties as before VM.
