

SIMATS ENGINEERING
CO3 - ASSESSMENT TOOL - 1: Experiments

COURSE NAME: Cloud Computing and
Big Data Analytics

COURSE CODE: CSA1522

Name	BRIJESH.T
Register Number	192521391

COURSE OUTCOME COVEREDCO3: *Implement cloud-based solutions using cloud storage, web APIs, and platform services for real-world applications. (BL3)*

Assessment Tool Weightage: 40%

Dave's Taxonomy: Precision (Level 3)
Question Count: 4

Total Marks: 40

Duration : 60 Minutes

Code of Conduct

I **Brijesh.T(192521391)** certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment.

I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the student:

Experiments Rubric

Criteria	Weightage	Level 4 - Exemplary	Level 3 - Proficient	Level 2 - Developing	Level 1 - Beginning
Experimental Design	25%	Design is systematic and technically strong	Mostly correct design	Basic design with gaps	Poorly designed activity
Use of Tools / Platforms	20%	Appropriate and effective use of cloud tools	Good tool usage with minor issues	Limited tool usage	Incorrect or missing tool usage
Application of Concepts	20%	Concepts are applied accurately to practical tasks	Mostly accurate application	Partial application	Weak application
Analysis and Output	20%	Strong analysis and meaningful outcome interpretation	Good analysis with minor gaps	Basic analysis	Little or no analysis
Documentation	15%	Clear, structured, and complete documentation	Mostly complete documentation	Partially complete	Poor documentation

Total Marks Awarded:

Assessment Tasks

Experiments

Experiment 1: Create a simple cloud software application for Library book reservation system for SIMATS library using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as Title of the book, author, publications, Year, edition, no of copies, Rack no, status (taken/returned) etc.

Experiment 2: Create a simple cloud software application for Payroll Processing System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as Name of the employee, experience in present org , over all experience, basic pay, HRA, DA, TA, net pay, gross pay etc.

Experiment 3: Demonstrate virtualization by Installing Type-2 Hypervisor in your device, create and configure VM image with a Host Operating system (Either Windows/Linux). Create a Virtual Machine with 1 CPU, 2GB RAM and 15GB storage disk using a Type 2 Virtualization Software.

Experiment 4: Demonstrate virtualization by Installing Type-2 Hypervisor in your device, create and configure VM image with a Host Operating system (Either Windows/Linux). Create a Cloning of a VM and Test it by loading the Previous Version/Cloned VM

EXP NO 1: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR LIBRARY BOOK RESERVATION SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SaaS

AIM:

To create a simple cloud software application for Library Book Reservation System using Zoho Creator as a cloud service provider to demonstrate Software as a Service (SaaS).

PROCEDURE:

Step 1: Go to zoho.com.

Step 2: Log in to the Zoho account.

Step 3: Select Zoho Creator from the available applications.

Step 4: Create a new application and enter the application name as SIMATS Library Book Reservation System.

Step 5: Create the new application for managing library books.

Step 6: Select Form to create a book details form.

Step 7: Add the necessary fields to the form such as:

- Title of the Book
- Author
- Publication
- Year
- Edition
- No. of Copies
- Rack No.
- Status (Taken/Returned)

Step 8: Save the form and enter sample book details.

Step 9: Create a report to display all the available book details and their current status.

Step 10: The cloud-based library reservation software is created successfully and can be accessed through the internet.

IMPLEMENTATION:

STEP1: GOTO ZOHO.COM

STEP 2: LOGINTOTHE ZOHO.COM

STEP 3: SELECT ONE APPLICATION

❖ Click Create from Scratch

STEP 4: ENTER APPLICATION NAME

Showing 2 of 2

RESULT:

Thus, the **SIMATS Library Book Reservation System** was successfully created using **Zoho Creator** as a cloud service provider, demonstrating the **SaaS model**. The application allows library book details to be stored, managed, and accessed through the cloud.

EXP NO 2: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR PAYROLL PROCESSING SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SaaS

AIM:

To create a simple cloud software application for **Payroll Processing System** using **Zoho Creator** as a cloud service provider to demonstrate **Software as a Service (SaaS)**.

PROCEDURE:

Step 1: Go to **zoho.com**.

Step 2: Log in to the Zoho account.

Step 3: Select **Zoho Creator** from the available applications.

Step 4: Create a new application and enter the application name as **Payroll Processing System**.

Step 5: Create the new application for managing employee payroll details.

Step 6: Select **Form** to create an employee payroll details form.

Step 7: Add the necessary fields to the form such as:

- Name of the Employee
- Employee ID
- Experience in Present Organization
- Overall Experience
- Basic Pay
- HRA
- DA
- TA
- Gross Pay
- Net Pay

Step 8: Save the form and enter sample employee payroll details.

Step 9: Create a report to display the employee details and salary information.

Step 10: The cloud-based Payroll Processing System is created successfully and can be accessed through the internet.

IMPLEMENTATION:

STEP1: GOTO ZOHO.COM

STEP 2: LOGINTOTHE ZOHO.COM

STEP 3: SELECT ONE APPLICATION

❖ Click Create from Scratch

❖ Create Multiple Forms according to our application.

STEP 6: THE SOFTWARE HASE BEEN CREATED.

The screenshot shows the 'Salary Component' form. It includes fields for 'Component Name', 'Component Code', 'Amount' (with a currency symbol), 'Is Taxable' (checkbox), 'Employee' (dropdown), 'Pay Period' (dropdown), 'Calculation Type' (dropdown), and 'Remarks'. At the bottom, there are 'Submit' and 'Reset' buttons. A language selection dropdown is also visible, showing 'English (India)'.

Component Name:

Component Code:

Amount: \$

☐ Is Taxable

Employee:

Pay Period:

Calculation Type:

Remarks:

English (India)

[Show Summary](#)

RESULT:

Thus, the **Payroll Processing System** was successfully created using **Zoho Creator** as a cloud service provider, demonstrating the **SaaS model**. The application allows employee salary details to be stored, processed, and accessed through the cloud.

EXP NO 3 :Demonstrate virtualization by Installing Type-2 Hypervisor in your device, create and configure VM image with a Host Operating system (Either Windows/Linux). Create a Virtual Machine with 1 CPU, 2GB RAM and 15GB storage disk using a Type 2 Virtualization Software.

DATE:

AIM:

To demonstrate virtualization by installing type-2 hypervisor in your device, create and configure VM image with a host operating system (either windows/linux).

PROCEDURE:

STEP 1:Download VMware workstation and installed as type 2hypervisor.

STEP2:Download ubuntu or tiny OS as iso image file.

STEP 3: In VMware workstation->create new VM.

STEP 4: Do the basic configuration settings.

STEP 5: Created tiny OS virtual machine.

STEP 6: Launch the VM.

IMPLEMENTATION:

STEP 1:DOWNLOAD VMWARE WORKSTATIONAND INSTALLED AS TYPE 2HYPERVISOR

STEP2: DOWLOAD UBUNTU OR TINY OS AS ISO IMAGE FILE

STEP 3: IN VMWARE WORKSTATION->CREATE NEW VM

STEP 4: DO THE BASIC CONFIGURATION SETTINGS.

WORKSTATION 20H2™ TECH PREVIEW

Experiment 4: Demonstrate virtualization by Installing Type-2 Hypervisor in your device, create and configure VM image with a Host Operating system (Either Windows/Linux). Create a Cloning of a VM and Test it by loading the Previous Version/Cloned VM

AIM:

To create a snapshot of a vm and test it by loading the previous version/cloned vm

PROCEDURE:

STEP 1: GOTO VMWARE WORKSTATION.

STEP 2: CREATE FILES ON DESKTOP.

STEP 3: CLICK ON VM AND SELECTS SNAPSHOT-> TAKE SNAPSHOT.

STEP 4: SNAPSHOT IS BEING DONE

IMPLEMENTATION:

STEP 1: GO TO VM AND GOTO MANAGE AND CLICK CLONE

STEP 2: CLICK CLONE
